The operation will be limited to 9.64 acres of active disturbance with additional areas being in various stages of reclamation. Nearly all runoff from the mine will be contained within a sedimentation pond.

There will be restrictions on mining during certain times of the year to avoid conflict with recreationists.

After Operations:

All permitted surface facilities will be reclaimed. Slopes will be regraded to not exceed 3h:1v using waste as backfill material.

Highwalls will be drilled and blasted to reduce the overall slope to 3h:1v. A minimum of 12 inches of subsoil and 6 inches of topsoil will be placed on the graded areas, and these areas will then be ripped 18 to 24 inches deep. An 18-acre borrow area will be used to obtain some of the soil needed for reclamation. The surface will be left rough then broadcast seeded with a mixture of 13 native species.

The person representing the company is Mr. Jerry Hascall; Phone (435) 781-5702, Vernal, Utah. Deseret Generation and Transmission is fulfilling obligations under the Utah Mined Land Reclamation Act of 1975, Utah Code Ann. §40-8-18.
